MAKEHAPPN

Business & Project Framework

Functions, Products & Project Stages | Dashboard Development Brief · 2026

Purpose: give the dashboard developer a clear overview of how MakeHappn operates, what it offers, and how work moves from the first client inquiry through delivery and financial closure.

1. About MakeHappn

MakeHappn is a multidisciplinary creative studio connecting ideas with the people who bring them to life. We work across curation, creative development, design, brand communication, production, and turnkey experiences.

Our model brings together an internal team, external creative talents, and trusted partners to deliver projects from concept to execution.

2. Core Business Functions

Function	Main Responsibilities
Curation & Creative	Research, ideation, concept development, creative direction, and experience curation.
Design Development	Visual identity, graphic design, spatial design, 3D design, and technical design development.
Brand Communication	Brand strategy, messaging, content, campaigns, and communication materials.
Production & Fabrication	Supplier sourcing, quotations, cost sheets, fabrication, purchasing, and execution.
Project Management & Operations	Project planning, timelines, task allocation, coordination, quality control, and delivery.
Marketing & Communications	MakeHappn's brand presence, portfolio, social media, and business visibility.
Finance & legal	Budgets, project profitability, invoicing, payments, expenses, and financial reporting.

3. MakeHappn Products & Services

Each project or client engagement should be assigned one or more products.

01. Curation

- Research and discovery
- Concept and experience curation
- Talent and partner sourcing

- Programming and activity curation

02. Design Development

- Creative direction
- Spatial and environmental design
- 2D and 3D design
- Technical design and layouts

03. Brand Design

- Brand strategy and positioning
- Brand identity
- Visual systems
- Brand applications

04. Brand Communication

- Brand messaging and storytelling
- Content strategy
- Campaign concepts
- Communication materials

05. Production

- Fabrication and manufacturing
- Printing and branding
- Sourcing and procurement
- Installation and setup

06. Turnkey Experience

- End-to-end experience development
- Curation and creative direction
- Design and branding
- Production and execution
- On-ground management and delivery

Dashboard requirement: a project can include multiple products. Users should be able to select products individually or combine them under one project.

4. Standard Project Stages

Stage	Description	Key Output
01. Lead / Inquiry	New client opportunity or incoming brief.	Lead record
02. Discovery & Briefing	Understand client needs, objectives, scope, and budget.	Approved brief
03. Proposal & Quotation	Develop scope, deliverables, timeline, and commercial proposal.	Submitted proposal
04. Project Confirmation	Client approval, contract, and advance payment.	Confirmed project
05. Creative Development	Research, ideation, concept, and creative direction.	Approved concept
06. Design Development	Develop visual, spatial, technical, and brand designs.	Approved designs
07. Planning & Pre-Production	Costing, supplier quotations, production planning, and scheduling.	Locked cost sheet and production plan
08. Production & Execution	Fabrication, procurement, installation, and implementation.	Completed production
09. Delivery / Event Day	On-ground coordination, quality control, and final delivery.	Delivered project
10. Closing & Evaluation	Final payments, documentation, reporting, and project review.	Closed project and final report

5. Core Project Information

Every project should have one central record containing:

- Project name and project code
- Client
- Project lead / owner
- Assigned team
- Product(s) selected
- Project scope and brief
- Project value / revenue
- Estimated and actual costs
- Start and delivery dates
- Current stage and status
- Tasks and deliverables
- Client approvals

- Partners and suppliers
- Payment milestones
- Final documentation

7. Core Dashboard Principle

One project = one central record connecting everything.

The project should link its client, selected products, assigned team, tasks, timeline, creative deliverables, partners, production costs, revenue, and profitability.

Management Level	Key Question
Business Level	Are we selling and making profit?
Project Level	Are projects progressing on time and within budget?
Team Level	Who is responsible for what, and what needs attention?

Objective: build one connected operating system for MakeHappn — from the first client inquiry to project delivery and financial closure.
